Mukta Nikate

Database Developer | SQL & Python Developer

Email: muktanikate1998@gmail.com | *Phone: +91 7796199846*

LinkedIn: linkedin.com/in/muktanikate

Professional Summary

SQL/PLSQL Developer with 2.5+ years of IT experience in database development, query optimization, and data migration. Strong expertise in writing complex SQL queries, stored procedures, functions, and triggers, along with performance tuning using indexing and execution plan analysis. Hands-on experience with Oracle, MySQL, PostgreSQL, and SQL Server in production environments.

Currently expanding skills in Python programming, including Django fundamentals and NumPy & Pandas for data analysis and data manipulation, to support backend development and data-driven applications. Familiar with Agile methodology and cloud fundamentals (OCI & Azure). Committed to delivering efficient, scalable, and reliable database solutions while continuously upgrading technical skills.

Core Competencies

- SQL & PL/SQL Programming
- Stored Procedures, Functions, Triggers
- Database Objects (Tables, Views, Indexes, Schemas)
- Query Optimization & Performance Tuning
- Data Migration & Validation
- Joins, Subqueries, CTEs
- Execution Plans & Indexing
- Python Programming (Basics–Intermediate)
- Django Framework (Fundamentals)
- NumPy & Pandas for Data Handling
- Data Analysis & Data Manipulation
- Agile Methodology

Technical Skills

- **Databases:** Oracle, MySQL, PostgreSQL, MS SQL Server
- **Languages:** SQL, PL/SQL, T-SQL, Python
- **Tools:** MySQL Workbench, pgAdmin, SQL Server, Oracle, TOAD, PowerBI
- **Cloud (Basics):** Oracle Cloud Infrastructure (OCI), Microsoft Azure Fundamentals
- **Scripting & Automation:** Shell Script, Bash

Professional Summary

Outworks Solutions Pvt. Ltd | SQL/PLSQL Developer

Jan2023 – Mar2025

- Designed and optimized SQL/PLSQL queries, stored procedures, and functions to support business requirements.
- Built and maintained database objects such as tables, views, indexes, and schemas for efficient data management.
- Enhanced performance of slow-running queries by applying indexing strategies and execution plan analysis.
- Assisted in ETL data migration projects, ensuring accuracy and consistency of migrated datasets.
- Automated recurring database operations like backups and data refresh using scripts.
- Provided production database support, troubleshooting issues, and ensuring high availability.
- Collaborated with cross-functional Agile Scrum teams for sprint planning, defect resolution, and knowledge sharing.

Projects:

1. Middleware Project – Database Development & Support

Role: Database Developer

Technologies: Oracle, PL/SQL, T-SQL, SQL Server, TOAD

- Developed complex PL/SQL and T-SQL scripts to support middleware integration.
- Improved **query performance** and optimized reporting outputs by analyzing execution plans.
- Assisted in **data migration and validation**, ensuring consistency and accuracy of migrated data.
- Implemented database access controls and security measures to safeguard sensitive business data.
- Worked in Agile environment for sprint deliverables and issue resolution.

2. Data Migration & Performance Optimization Project

Role: SQL/PLSQL Developer

Technologies: Oracle, PL/SQL, MySQL, ETL Tools

- Designed and executed ETL workflows to migrate data from legacy systems to Oracle and SQL Server.

- Validated and reconciled migrated data to maintain **100% accuracy** and business continuity.
- Tuned long-running queries and improved performance of reports by **30%** through indexing and execution plan optimization.
- Automated data validation scripts to reduce manual testing efforts.
- Provided post-migration support, resolving data-related issues in production.

3.Middleware Project
Role: SQL/PLSQL Developer
Technologies: Oracle, MySQL, SQL, PL/SQL

- Improved query performance by using indexing and basic query optimization techniques.
- Supported ETL tasks for migrating data from older systems to SQL Server.
- Used T-SQL Common Table Expressions (CTEs) to simplify complex queries and improve readability.
- Collaborated with business analysts to understand data requirements and ensure proper data mapping.
- Helped in optimizing stored procedures to improve application performance.
- Designed and maintained database objects such as tables, views, indexes, and schemas.
- Wrote PL/SQL and T-SQL procedures, functions, and triggers to automate business logic. Participated actively in Agile Scrum teams, handling sprint planning, backlog grooming, defect triaging, and continuous integration activities.
- Monitored database performance and used execution plans to troubleshoot and tune queries.
- Created basic shell scripts to automate routine tasks like backups and data refresh.
- Helped manage data security by controlling access to tables, views, and database objects.

Education

- **Bachelor of Computer Science –** SKN Sinhgad Institutes, Pandharpur (2019 – 2022)
- **Diploma in Computer Science –** New Satara College of Engineering, Pandharpur (2017 – 2019)

Certification

- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Oracle Cloud Infrastructure 2023 Foundations Associate
